

Massachusetts Commercial Food Scraps Disposal Ban – One-Year Milestone

John Fischer, MassDEP
Air & Waste Mgmt. Assoc.
October 2015

Waste Bans Background

Purpose:

- Part of a comprehensive approach
- Ensure materials available for recycling & composting facilities
- Drive infrastructure investment and market development
- Limit need for disposal capacity

Waste Ban Background

Who do they apply to?

310 CMR 19.017(3)(a): “No person shall dispose, transfer for disposal, or contract for disposal of the restricted material...”

- **Solid Waste Facilities**
- **Haulers**
- **Generators**

Banned Materials

- Recyclable Paper/Cardboard
- Glass, Metal, Plastic Containers
- Leaves and Yard Waste
- Asphalt Pavement, Brick, Concrete, Metal, Wood and Clean Gypsum Wallboard
- Lead Acid Vehicle Batteries and Tires
- Cathode Ray Tubes
- White Goods (large appliances)
- * *Tires and Wood can be accepted at municipal waste combustors*
- **Overall, waste ban materials = about 40% of trash disposed**

MassDEP Waste Ban Compliance Strategy

- Using facility and third party data
 - Outreach and targeting inspections
- Increased inspections and enforcement
 - Inspections at solid waste facilities
 - Looking for large amounts of banned materials
 - More than 350 enforcement actions since January 2013
- RecyclingWorks resources and assistance

Food Waste

Organics Policy and Goals

- Solid Waste Master Plan
 - Overall goal – reduce disposal by 2 million tons (30 %) annually by 2020
 - Reduce disposal by 80% by 2050
- Primary Goal – Divert additional 350,000 tons per year of organic materials from disposal by 2020
- Clean Energy Results Program
 - Support the development of renewable energy in Mass.
 - Goal to have 50 MW of anaerobic digestion in place by 2020

Why focus on food waste/organics?

- Food waste and other organics >25% of disposal in Mass. > 1 million tons per year
- In 2010 (fall & winter sampling)
 - Food waste estimated 15% of MSW disposal
 - Compostable paper 6 % of MSW disposal
- In 2013 (spring & summer sampling)
 - Food waste 19% of MSW
 - Compostable paper 8% of MSW

Benefits

- Digest for energy and/or compost to produce soil amendments/fertilizers
- Management solutions for dairy manure & wastewater residuals
- Generate energy at farms, waste water plants, other locations
- Cost effective materials management for businesses/institutions
- Reduced reliance on disposal capacity

Organics Action Plan Overview

- Comprehensive, integrated set of strategies
- Developed working with stakeholders
- Focused on 2020 goal – 350 K tons additional diversion annually
 - Data Analysis
 - Collection Infrastructure
 - Processing Capacity/Market Development
 - Regulatory Reform/Waste Ban

Organics Subcommittee

- Very diverse set of stakeholders – reached out to broaden
- Email list of nearly 500 people, organizations
- Has met as needed for over a decade
- Primary forum for Organics Action Plan and organics waste ban framework in 2012-2013
- Successful in getting diverse engagement and support

Other Outreach

- Mass Food Association partnership
- More than 60 meetings and webinars in 2012-2013
- Targeted sector and association outreach
- RecyclingWorks outreach and assistance
- Newspaper articles
- Built credibility through collaboration and on the ground work

Commercial Organics Waste Ban

- Took effect October 1, 2014
- Food and vegetative material
- Does not apply to management in wastewater
- Commercial/institutional organics – dispose > 1 ton/week (*disposed, not generated*)
- Estimate – 1,700 businesses/institutions subject to the ban
- Focus now on outreach and compliance assistance

RecyclingWorks in Massachusetts

- State-funded assistance
- Helps businesses and institutions maximize waste diversion opportunities
- Services include:
 - Online resources
 - RecyclingWorks hotline
 - Direct technical assistance

Estimate using Industry Standards

- Average food waste disposal data compiled by sector
- Industry sectors include:
 - Colleges & Universities
 - Correctional Facilities
 - Elementary & Secondary Schools
 - Hospitals
 - Lodging & Hotels
 - Nursing Homes
 - Restaurants
 - Supermarkets
 - Venues & Events

Food Waste Diversion Options

Reduce

Reduce the total volume of food waste generated

Donate

Donate unused food to people through food banks, soup kitchens, and shelters

Process

Best Management Practices – Food Donation

- Worked with state and local health officials, donation organizations, and large donors to develop recommended best practices
- Available through RecyclingWorks website
- Covers storage, handling, transportation, communication, and communication
- Intended to provide clear agreed upon general approach
 - may still be some specific variations

Best Management Practices Food Waste Separation

In the Kitchen

- Ensure containers are
 - Labeled
 - Leak proof
 - Covered when not in use
- Remove food waste from the kitchen at the same frequency as trash

Best Management Practices

- Dumpsters, toters, or compactors should be
 - Cleanable
 - Leak-free
 - Capable of being locked
- Food waste should be collected for processing at least
 - 2 times per week in the summer
 - 1 time per week in the winter

For more information, see our [Food Waste Diversion Guide for Restaurants](#)

Initial Draft Results

- Food waste reduction
 - One example: 13 institutions working with Lean Path achieved reduction of 286 tons annually
- More than 25,000 tons of food donated annually
- More than 1,600 businesses diverting
- >130,000 tons diverted annually to composting, animal feed or AD

Next Steps

- Continued outreach & assistance
- Monitor compliance/enforcement
- Foster management options for packaged food materials
- Outreach/promotion of improved donation programs
