

## **Eian Lynch**

### **NEO Energy, LLC**

**Eian Lynch** is the Director of Engineering for NEO Energy, LLC where he is currently leading management of project development of NEO's food waste digestion and organic fertilizer production facilities in North America, currently focusing efforts on permitting and pre-construction design of NEO's North Kingstown, RI AD facility. Eian also manages engineering and operations of NEO's pilot AD and fertilizer production facility in Portsmouth, NH and leads efforts in optimizing NEO's patented digestate management system for organic fertilizer production. Prior to NEO, Eian was the project manager responsible for the design, construction, and commissioning of Harvest Power's Co-digestion facility in Orlando, FL and also led troubleshooting efforts for Harvest's other AD facilities in Richmond, BC and London, Ontario. He started his career working on municipal AD and nutrient removal systems as an engineer for Brown and Caldwell, and holds a BSc in chemical engineering and an MSc in Environmental Biogeochemistry.
